

SELENIA STAR PURE ENERGY Cod. 1413

DESCRIPTION

Selenia StAR Pure Energy is the new fully synthetic lubricant for new Alfa Romeo petrol engines. With its low ash content it passes the new ACEA C3 specification and offers total protection of the catalyst, thereby lengthening its life cycle.

CHARACTERISTICS

Its unique formula maximises the features of engines with a high specific power, improves cold starting and keeps viscosity constant throughout the interval between changes.

The new Alfa Romeo petrol engines can combine fuel saving, low emissions, ease of handling and top performance thanks to the adoption of innovative technical solutions such as direct injection and the turbine with variable geometry. The new petrol power units can thus offer considerable advantages in terms of reducing pollution ensuring excellent handling features and noiselessness.

- | Selenia StAR Pure Energy is the lubricant especially formulated to maximise fuel economy, warrant compliance with anti-pollution regulations, protect engines created to operate at ever higher temperatures and enhance the typically sporty character in turbocharged versions.
- | This unique formula presents extreme shear stability and maintains stable viscosity level, offering maximal protection to high specific power engines.
- | High performances at high temperatures

ADVICE ON USE

As per OEM owner manual

RECOMMENDED BY

Alfa Romeo

TECHNICAL DATA

SAE 5W-40, API SM/CF, ACEA C3,
FIAT 9.55535-S2 CONTRACTUAL TECHNICAL REFERENCE N°F603.D08
